idea

A photograph of a paved path in a park. The path leads from the foreground into a distance where there are trees and a bench. The ground is covered in grass and some fallen leaves. The lighting suggests it might be early morning or late afternoon.

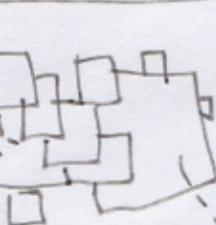

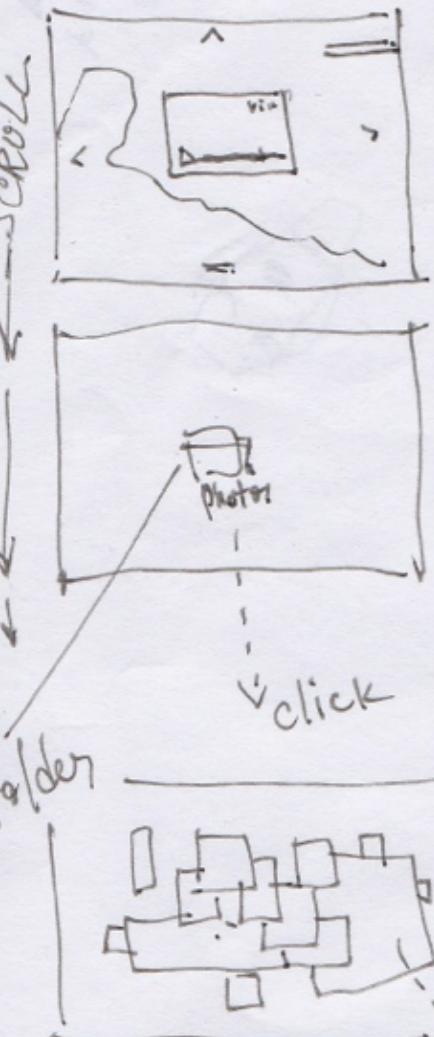

The idea of "The Diary" project came from the fact that I used to kept the hard copy diary where I glued all the stuff I've made or liked: my own photos, drawings, herbarium and etc.

This project is a try to move the same feeling and mood to a different media. To make it interactive and include new features that were impossible to place into the paper. Also, I'm interested in video making and it takes a part in my art.

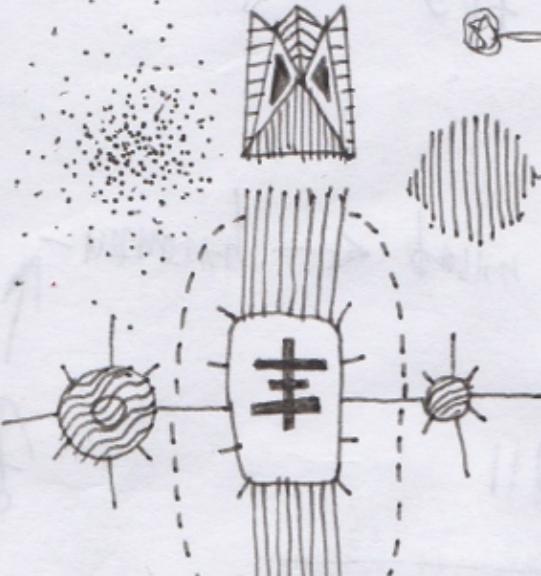

So this is what I've missed in my hard copy diary. Videos — as a short sketches from memory and music helps to creates the feelings.

INTERACTIVE DIARY

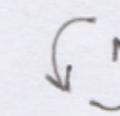

- photos/gifs. mostly. - drag the photos
- videos
- illustrations.
- story telling.
- favourite poems/quotes
- gifs.
- music — mood.
- folders.

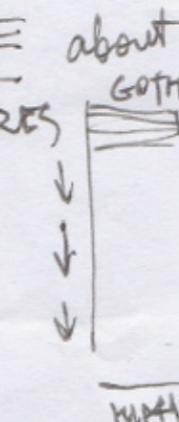

- TREND LIST GENERATOR - NO.
- HISTORY - EDUCATION PLATFORM - ARTICLE about
- STORY OF ONE TRIP (videos + text + photos) (small)
- INFORMATION

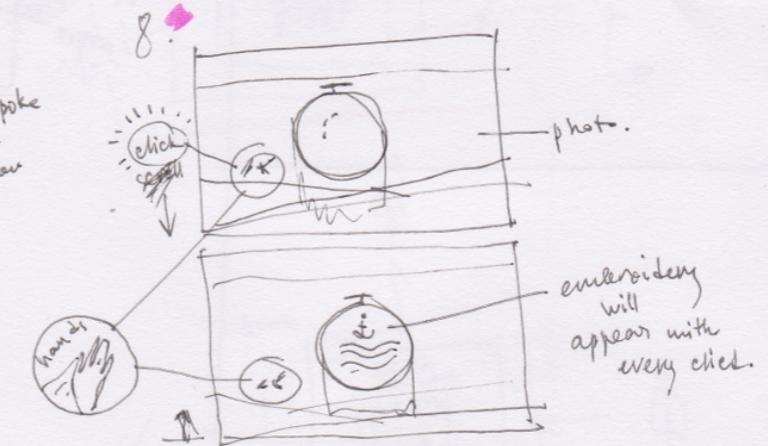

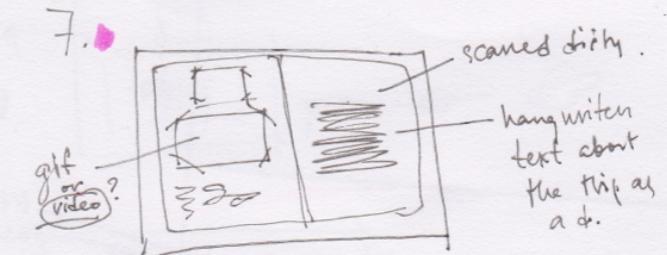

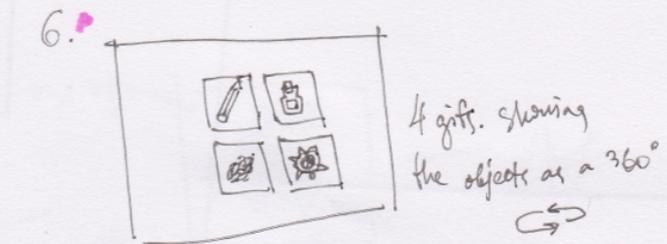

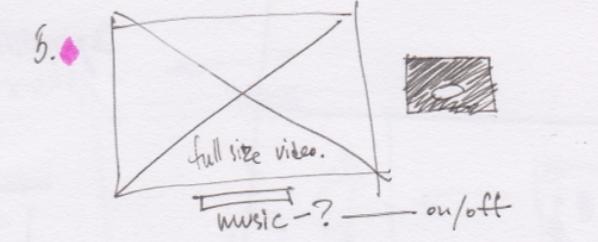

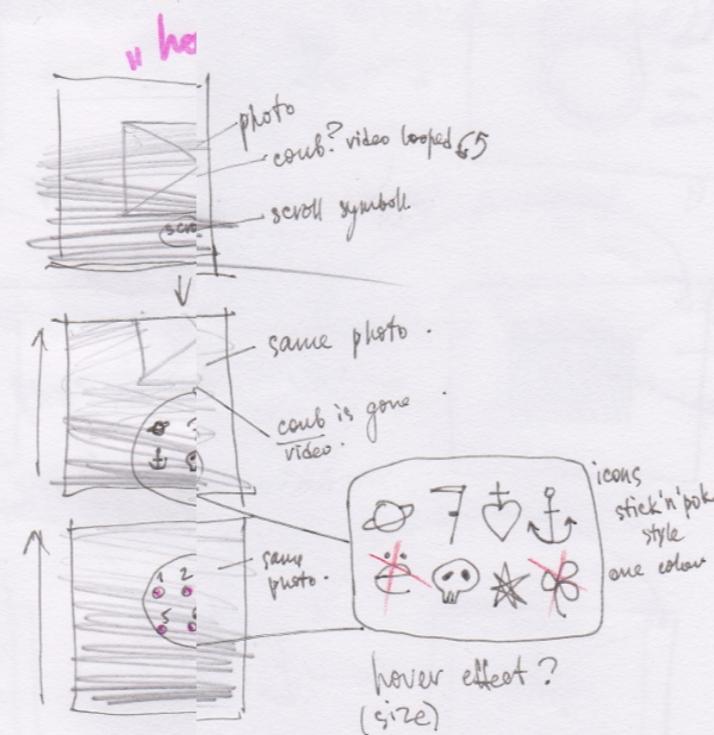

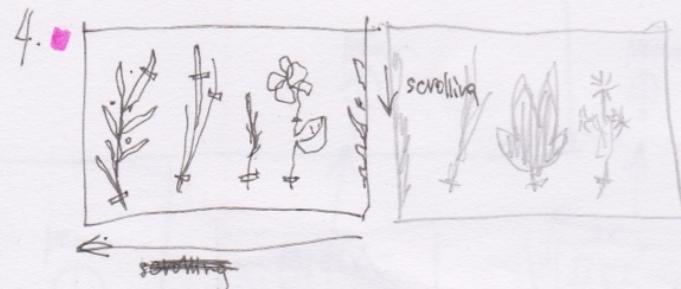

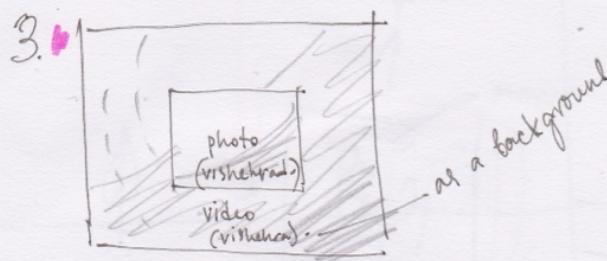

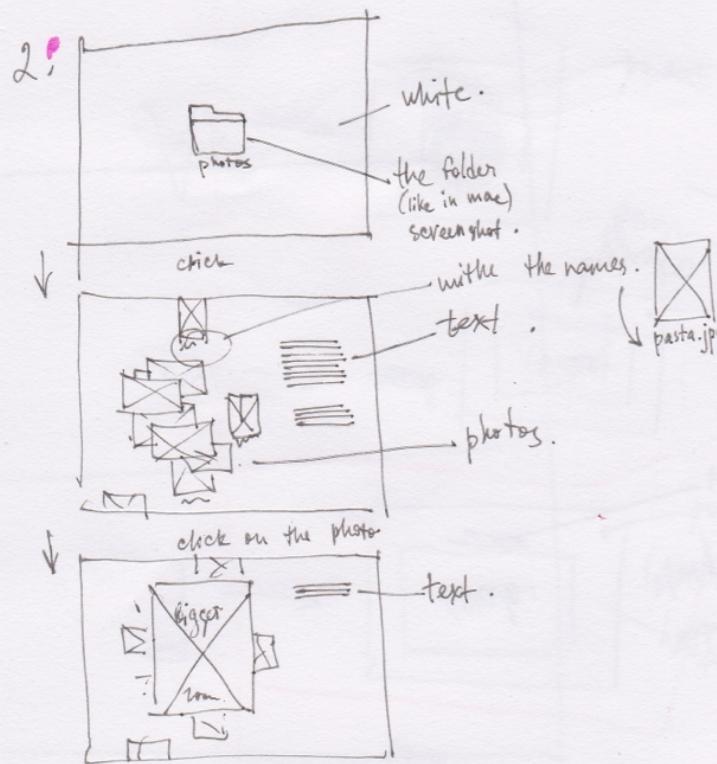

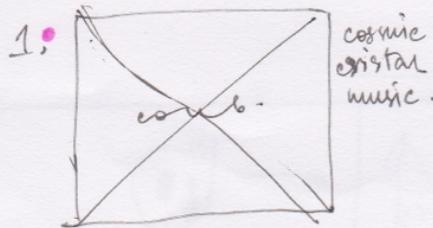

interactive stories: - where I found it etc.

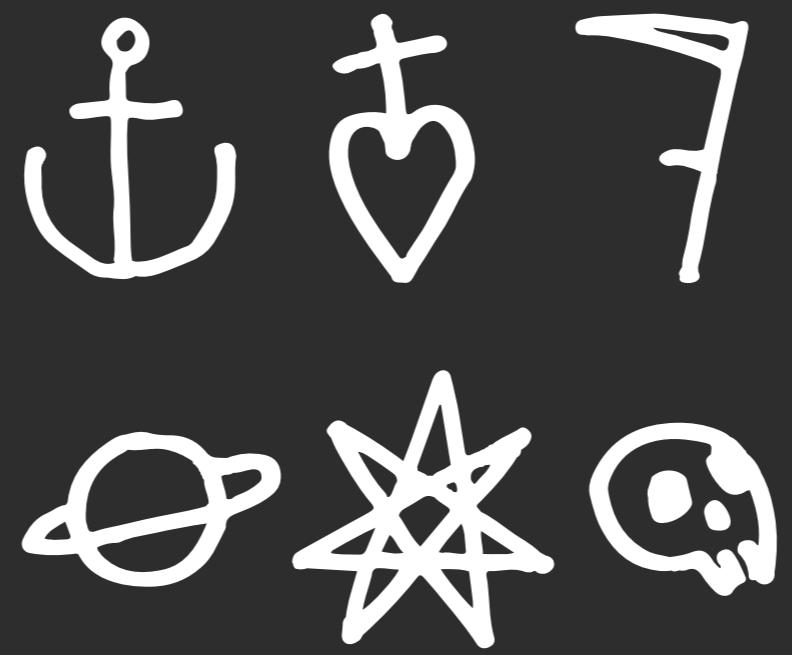

timeline - events

```

For me it was a bit difficult to get to the core of programming techniques and remember how to use most of the scripts, so I've tried not to risk and just play a bit with what I know for sure. The help of patient teacher was very useful. The only thing, teacher decided to relieve my life and showed me how to use a link to css style shit. At first I was very happy, but later I've realized that this technique is not suited for me for this type of project. Because there were too many details and I returned it all back. But I'll remember it and may use it for a future. For the answers I've searched various blogs and forums. But since my project is quite simple, how to fix most of my issues we were taught in the lectures.
